Subj: SAFETY AND OCCUPATIONAL HEALTH POLICY STATEMENT

1. As Commander, Fleet Activities Sasebo (CFAS), I am accountable for the well-being of all Military, United States Civil Service Civilians, U.S. Government Contractors and Host Nation employees. This policy statement expresses my commitment to provide a safe place to work, live and play. Supervisors will communicate and enforce safe work practices and ensure that all employees in their organization are provided the proper training and equipment to safely carry out the mission. Supervisors are also expected to proactively integrate safety measures into daily activities and endorse mishap prevention by promoting safety training to include ensuring compliance with the Enterprise Safety Applications Management System. I would like to assure all employees that they can report unsafe and unhealthy working conditions to their supervisors' or directly to the CFAS Safety Department without fear of reprisal. All employees must strive to do their bests and always look for safe ways to meet the mission and improve processes. With your support, we can reach our goal of providing quality mishap-free support to the Fleet.

2. If you have any questions, talk to your immediate supervisor or the CFAS Safety representative at DSN: 252-3512.

D. J. ADAMS
